Your essential innovation upgrade

Innovation is no longer the responsibility of a few lonely mavericks. Most large companies now take innovation seriously, implementing labs, training, programs, and dedicated innovation functions. Innovation culture is thriving.

Since 2011, we've hosted intimate, immersive, and impactful gatherings to help corporate innovators understand how their peers operate, to experiment with new methods and tools, and to learn essential skills.

We've already visited innovation hotspots like London, Munich, New York, Paris, Singapore, Stockholm, San Francisco and Tel Aviv — our next stop is Madrid.

"The only conference I have been to that actually created meaningful impact."

"I got true learning
and growth out of it."

"I had an amazing
experience, and came
home with my brain
on fire."

Next to him, a woman is also raising her hand. They are both smiling and looking towards the front of the room. Other people in the background are also visible, some with their hands raised. A different kind of event

innov8rs

Innov8rs events are designed to help you connect and collaborate with people in similar roles, chasing similar objectives, facing similar challenges — your tribe.

Across 40+ different sessions over four days, you'll experience trending topic talks, case study talks, whiteboard sessions, workshops, masterclasses, field trips and project booster sessions. We don't just want to leave you feeling inspired, we want to help you take action while you're with us, ready to implement once you leave.

If that all seems like too much for one person, bring your whole team along to gather insights from all of our speakers, then work with experts in dedicated project booster sessions to maximize your organization's learning.

"The most varied and beneficial conference I've attended over the past 15 years."
